TO: Resident of East Ormond Avenue

RE: **PROJECT STATUS**  
Improvements to the Sanitary Sewer Collection System in the Bettewood Section of the Township of Haddon, Camden County, New Jersey (Funded through the New Jersey Department of Environmental Protection Municipal Wastewater Assistance Program, N.J.D.E.P. Project No. S340115-01 (KEI #10-1297))

Dear Resident:

All of the gas mains, water mains and utility service installations have been completed on your street. On Friday morning, July 30, 2010, the contractor disconnected and abandoned the old water main on Ormond Avenue and all flow to the homes is now coming from the new water main.

The contractor will begin installing the new concrete curbing on Monday, August 2, 2010, weather permitting. The curb work will begin at the White Horse Pike. The contractor will work on the east side of the street (even number addresses) until he reaches Johnson Avenue. We request that the residents on the east side of the street have all necessary vehicles removed from their driveways and all cars removed from the curbline so the work can be performed.

After the east side of the street is completed between the White Horse Pike and Johnson Avenue, the contractor will then begin work on the west side of the street (odd number addresses). When that time approaches, we will notify the residents on the west side of the street, in advance, of the work so all necessary vehicles can be removed from the driveway and street line.

As soon as the length of the street between the White Horse Pike and Johnson Avenue is complete, we will notify the residents on Ormond Avenue of the curb construction between Johnson Avenue and the dead end.

This notice will also be placed on the Township website for your convenience.

We thank you for your patience during the construction and if you have any questions or comments, please do not hesitate to contact me at this office.

Sincerely,

Gregory B. Fusco, P.E., P.P., C.M.E.  
Haddon Township Engineer
