TO: Residents of East Ormond Avenue

RE: **PROJECT STATUS**
Improvements to the Sanitary Sewer Collection System in the Bettewood Section of the Township of Haddon, Camden County, New Jersey
(Funded through the New Jersey Department of Environmental Protection Municipal Wastewater Assistance Program, N.J.D.E.P. Project No. S340115-01(KEI #10-1297))

Dear Resident:

The contractor will begin installing the new concrete curbing on Ormond Avenue between Johnson Avenue and the dead end on Wednesday, August 4, 2010. The contractor will work on the east side of the street (even number addresses) until he reaches the dead end. We request that the residents on the east side of the street have all necessary vehicles removed from their driveways and all cars removed from the curbline so the work can be performed.

After the east side of the street is completed between the Johnson Avenue and the dead end, the contractor will then begin work on the west side of the street (odd number addresses). When that time approaches, we will notify the residents on the west side of the street, in advance, of the work so all necessary vehicles can be removed from the driveway and street line.

This notice will also be placed on the Township website for your convenience.

We thank you for your patience during the construction and if you have any questions or comments, please do not hesitate to contact me at this office.

Sincerely,

A handwritten signature in black ink, appearing to read 'Gregory B. Fusco', is written over a printed name and title.

Gregory B. Fusco, P.E., P.P., C.M.E.

Haddon Township Engineer
